

On-Site Loose Parts Learning In Action

Learn about incorporating loose parts into your centre with a loose parts incursion and professional development session in one. Reverse Garbage will set up an exciting selection of open-ended materials for your children to explore and enjoy. The incursion is complemented with a 1-hour professional development session to extend your staff teams capacity to enrich sustainability learning in early childhood settings based on a reflective observation approach.

On-Site “Loose Parts Play” Demonstration

Reverse Garbage will come at your Early Childhood Learning (ECL) centre and deliver a 2-hour practical training and demonstration session in *Loose Parts Play* based on the creative reuse of materials for early childhood settings. The demonstration will also explore how educators can transform play spaces by creating thoughtful and inspiring environments in their early childhood settings. This session will include:

- Experienced trainer in EC *Loose Parts Play*.
- Loose parts and open-ended materials suitable for EC, curated by ECE.

“Loose Parts Play” Professional Development

This 1-hour professional development workshop will cover key aspects of the theory of *Loose Parts Play*. This session will explore how early childhood educators (ECE) can apply sustainability principles through a creative reuse of loose-parts and open-ended materials. The workshop will also include reflections on observations of real cases of children’s play and its relationship to the Early Years Learning Framework.

“Loose Parts” Materials

The ECL centre will receive two deliveries of loose parts and open-ended materials curated by EC educators, suitable for *Loose Parts Play* in early childhood settings. Each delivery will include an equivalent of \$350 in curated materials and loose-parts (including transportation and curation fees), suitable for up to 30 children playing simultaneously.

The first delivery of materials will be delivered to your centre as part of the “Loose Parts Play” Demonstration session. It is recommended your second delivery arrive 6 months after the first one, scheduling with at least a month’s notice with Reverse Garbage staff.

Fees

- On-Site “Loose Parts Play” Demonstration & Professional Development (3hrs): \$800
- Curated “Loose Parts” Materials (2 deliveries): \$700
